## Grading

Activities in class are assessed on Oregon Skill Set Standards for Career Technical Education (CTE). These standards relate to course information and career ready skills. Grades are assigned as follows:

90%+ = A

80-89% = B

70-79% = C

60-69% = D

59%- = F

Projects are graded using scoring rubrics. Make up or retake tests must be taken outside of class time within 1 week of original test date. No late work is accepted once the unit test has been given.

Daily "The More You Know" books are due on test day.

<theaet.com> online recordbook will be used in class. This component of the class will represent 10% of a class grade.

*Missing Work*

Check the box or with your neighbor to get the missing assignments. Missing labs will require coordination with the teacher to make up. Don't miss lab days.
