

Military EA Project

SHS Student

NATIONAL GUARD

Why the Military

- Opens up more options
- I know more about what I would go through
- Allows me to start early and what I want to take
- I've learned quite a bit from my step-dad and taught me what I want to know
- Since I was young I've been wanting to look what parts of the military
- I use to be in boy scouts which gives me a better chance with the military
- Could continue more education based on a couple things that I would want to learn

Opportunities towards the military

- It will give me a better chance in the long run
- Gives more education opportunities
- Opens up more decisions on what I would want to do
- I have been thinking about what types of things I want to do and what it will lead me to and how my future would be based upon it

Navy

- Basic training is based upon what I would go into
- I have been looking more into their airship engineering
- One of the things I would like to do is the traveling
- The ships are something I also have been interested in
- Getting to know a lot more of new people
- Pride that I am serving my country

National Guard

- I enjoy the opportunities they give me
- If I were to join the national guard I would know more people that would be in my unit.
- Basic training is on weekends and happens every month
- Helps pay for my education and expenses
- Pride from serving my country

Advantages of joining the Military

- Helping the country out
- Education and expenses paid for
- There's more time they schedule for the family
- Helps looking for different options in jobs and activities

Questions I still have

- How long am I supposed to be in the military
- What more does it offer for my family and future
- How often am I gonna be active

Next steps

- Applying for either a college or enlist in the Navy or National Guard(not decided)
- Start figuring out what my options would be and learn what the best route would be
- Figure out what I want for my future
